DETAILED ACTION

Response to Amendment

1. Applicant's amendments and accompanying remarks filed 1/30/04 have been entered and carefully considered. Applicant's amendment is not found to patentably distinguish the claims over the prior art and Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsutsumi et al (5223311).

Applicant argues that Tsutsumi fails to teach a coating material consisting essentially of an ethylene-butyl acrylate polymer. The coating material of Tsutsumi contains other materials; however, it is the examiner's position that these materials do not materially alter the basic and novel characteristics of the coating.
